— ABOUT LECTROPOWER

Over 40 Years of Pumping Expertise

From our operations centre in eMalahleni, Mpumalanga, Lectropower supplies, rents, repairs and engineers pump systems for mining and industrial clients across South Africa. Our business is built on trust, earned over 40 years through experience, continuous improvement, honesty and an unwavering focus on client outcomes.

Mining demands reliability. Downtime costs. We understand this intimately. Our in-house workshops, test facilities and field teams work as one accountable partner, delivering supply, rental, repair, electrical and fabrication services under one roof.

— WHAT SETS US APART

Sole FLYGT Distributor:

Direct access to world-leading Xylem submersible pump technology in Mpumalanga

Mining-Proven Expertise:

Four decades of understanding mining operational and safety requirements

In-House Testing Facilities:

Every repair is tested through our dedicated test bay and test dam before returning to site, helping ensure equipment performs as intended under operational conditions.

Certified Repair Capability:

Our workshop is certified to perform repair and maintenance work on both standard and flameproof pump systems, supporting clients operating in demanding and hazardous environments.

— OUR CAPABILITIES

Complete Pump Solutions Under One Roof

Lectropower brings technical knowledge, workshop capability and field experience together under one accountable partner. Whether urgent support or strategic long-term collaboration, our in-house capabilities deliver reliability.

CORE SERVICES

Pump Supply

Industrial and mining pump solutions specified for your site conditions and operational demands.

Bespoke Water Management

Custom pump stations, skids, trolleys, control panels and water transfer systems engineered for your site.

Pump Rental

Rental pumps and dewatering equipment for breakdowns, flooding, temporary capacity or project-based needs.

Electrical & Cable

In-house electrical panel manufacturing, cable jointing and Ex d solutions for hazardous areas.

Certified Repairs

MASC-certified repairs for standard and flameproof systems, tested in our dedicated test bay and test dam.

OEM PRODUCT PARTNERS

FLYGT / Xylem Submersible Pumps

World-leading submersible technology for mining dewatering, slurry transfer and hazardous area applications.

Pioneer Surface & Diesel Pumps

Robust surface-mounted and diesel-driven solutions for high-capacity, temporary and mobile deployment needs.

KSB Centrifugal Pumps

Precision centrifugal systems for industrial water management, cooling and circulation applications.
